Re: Emergency Closure Procedures

Safety for all children is one of the District's top priorities. Under some circumstances, schools cannot open due to loss of the utilities (water, heat, and/or electricity), severe weather, or dangerous road conditions. When this happens, the District will contact the Santa Cruz County Office of Education and they will contact the local radio and television stations listed below. The radio and television stations will broadcast spot announcements as often as possible.

Please tune in to one of the following stations to listen for school closure information:
